Aim/Hypothesis:

- Setting up the CDK on eclipse
- Trying to understand the structure of the code

Description:

The project was cloned into eclipse using Egit plugin. I read more about CDK and tried o create the documentation file using the cdk-builts-utils package.
I got introduced to the CML and the way it looks.

Questions :

- A bit lost where to start.
- I like to know the current stage of this project.
- I think I understood the goal of this project but still many things are a bit vague to me.
- Which part of the CDK code I need to focus on to understand.
